Aquatec Group has acquired a 30 acre facility in Burnt Bridge Road, approximately 3km North of Chinchilla. It includes a modern office / house and shed which will be further developed to serve as the base for our operations supporting the coal seam gas industry. Having staff based in Chinchilla is expected to improve service for our customers in this important emerging industry which has utilised our MF/RO water technology to treat water produced by the wells and also our Capstone MicroTurbines. These unique MicroTurbines offer unparalleled reliability in generating power for sites remote from the grid and offer exceptionally low greenhouse emissions.
