

From 2013-2014, Aquatec Maxcon Asia, the Thailand manufacturing arm of the Aquatec Maxcon Group Limited, constructed 86 cryogenic iso transport containers for the shipment of industrial gases for its sister company, Cryeng Group Pty Ltd. The iso containers have a capacity of 20,000 litres and a pressure rating of 10 bar.

These tanks were used by Bechtel Corporation at its Gladstone liquefied natural gas plant construction site for customers, Gladstone LNG and Australia Pacific LNG.

These tanks have now been shipped to India to help in the transport of critical oxygen supplies to hospitals throughout India.
